INTRODUCTION

In Volume I the history of the Coffin Texts project, the basis on which the texts are arranged, and the conventions adopted were explained. For the user's convenience certain information of the last type is repeated here, as it was in Volumes II and III.

Figures with an asterisk (1*, 2*, etc.) in the blank column to the right of any text column refer to the notes. These have, as far as possible, been given on the same page.

Dashes beside signs (|) mean that these signs were not seen by Dr. Gardiner or myself but rest on some other authority—publication or manuscript copy. In the vast majority of cases the authority in question is the manuscript of M. Lacau. As most former copies or publications do not preserve the arrangement of the originals, my arrangement of the signs in these parts is wholly arbitrary.

The symbol ↕ is employed to indicate that the signs or sentences separated thereby follow one another in the original without any break.

Sometimes a simple line | will be found. Such a line has no other intention than to guide the eye, for example, if a text starts near the bottom of a page, thus being far away from its designation in the heading of the page. If such a line occurs between words or groups of words, these do not follow one another immediately in the original.

Circumstances beyond their control have obliged the editors to abandon in this volume reproduction in color of the original Egyptian rubrics. Instead, an unmistakable background pattern ▒▒▒▒▒ has been applied to all rubrics, and it is believed that the reader will experience no difficulty in recognizing the substitute wherever it occurs.

The notes are very brief and have been confined to purely textual matters—corrections, erasures, and the like. Also, in the case of a complicated arrangement or disorder in the manuscript, they help the reader to visualize the original.

The letters on the left-hand side of the page or of each group of parallel texts are meant to facilitate the quoting of the texts, which should in the editors' opinion be quoted by volume, page, and letter—for example, I 79 *a*, IV 159 *d*, etc.
